

B.B.C: Building Bridges Creatively

ABOUT THE PROJECT

The project is based on both tangible and intangible cultural heritage, and natural heritage. It is about festivals, ceremonies, natural beauties, landmarks, historical places, education systems, etc.

AIMS

The main aim of the project is to build bridges among countries, raise awareness about cultures, strengthen relationships, show how peacefully we can live, tolerate and respect differences.

By the way, students will find the opportunity of improving their English and ICT skills.

And also we aim for students

To express themselves

To respect different ideas

To develop critical thinking and empathy

To make new friends from different countries

To raise awareness about different cultures

To develop communication, leadership, collaboration skills

WORK PROCESS

The project will last 3-5 months. It depends on the holidays and exam weeks. Students will play games, have quizzes, prepare videos, presentations, posters, etc and they will also attend online meetings, take part in mixed international teams. Partners will decide on the activities together.

EXPECTED RESULTS

Thanks to this project, we expect to build bridges in a fun and creative way among countries. Students will have been aware of the fact that they have friends who live far away. They will have learned how different people peacefully live together. They will see the importance of universal values such as love, respect, and tolerance while building bridges among themselves.
