Vocational subjects of teaching:IT

Key competences: Citizenship, Digital, Literacy

Where the technology advances rapidly, new information emerges everyday, social networks spread rapidly and are used in the new order, to find out our place in the most correct and healthy way to include our young students in their education as much as possible, to enable them to take responsibility for their own education, and while doing this ,to enable them to use social networks with the most accurate and beneficial way.

And with all these things ,these days we have another concern,e-Safety.We want our students to know enough knowledge about e-Safety and being a good digital citizens.So we will try make them strong about all these topics.
