

# eTWINNING CORNER

In the digital world, security is possible with e-security.

the millennium z

Ensuring your security is in your hands, protect yourself with e-security.

Stay safe in the digital world with e-security.

**The Millennium Z Project**  
Membership: Turkey, Brazil  
Age range: 14-18  
Subjects of Learning: Foreign Languages, Informatics / ICT, Media, Educational Technology  
Educational Objectives of Learning: IT, Environmental Awareness, Digital Literacy  
When the technology advances rapidly, new information emerges, creating virtual networks, virtual reality and we tend to live our lives in the virtual world. We need to be careful and healthy and to include our children in this information and virtual world. We should think to the most appropriate age appropriate and healthy way.  
And with all these things, these days, we have another concern, safety. We want our children to have enough knowledge about e-security and being a good digital citizen. We will try to make them understand about these things.

Please follow our Instagram account to learn more about e-safety.

@THEMILLENNIUMZ

If something seems funny or unsafe, stop and ask for help.  
Scammers can be sneaky and can even pretend to be someone you know. If something doesn't seem right or makes you feel unsafe, stop and ask for help from a parent or guardian.

the project logo

Be wary of contacts or "friends"  
Contacts and friends are a very common way for scammers to get your personal information. Do not click links, download attachments, or provide personal information such as your name, phone number, address, passwords, etc. without permission from a parent or guardian, even if there is a "countdown clock" or other perceived sense of urgency.

Be a nightmare for cybercriminals with e-security.

Turn to e-security solutions for your security.

**THE MILLENNIUM Z**  
Despite the all the dangers on the internet don't be scared, consider e-safety to be awarded.  
**E-TWINNING**  
E-SAFETY  
EducatioNal TechnoLogY  
Forum that help you can protect your security.

Don't post photos or videos without your parent's permission.  
Even if a photo seems safe to post, it can contain location codes that show where and when the photo was taken which can reveal personal information about you like your address or school. Before posting or sharing photos online, talk to a parent.

our logos

Don't give your personal information.  
It's important not to share your username, email, address, telephone number, school or other information about your family with people you don't know.

**E-SAFETY**  
Protect your personal information.  
Don't give your personal information to people you don't know.  
Be a nightmare for cybercriminals with e-security.

Take e-security measures to keep the internet safe.

Without e-security, there is no safe internet.

Protect yourself against cybercriminals, equip yourself with e-security.
